(a) Thermal background is not negligible
bistability threshold $\sqrt{3}\kappa_1$
$|\delta\omega_1|/\kappa_1$
input power ($\mu$W)
cascaded Kerr
native Kerr
thermal ($f_{\rm abs}=0.3$)
thermal ($f_{\rm abs}=0.05$)
(b) Isolating the cascade at $P_{\rm in}=20\,\mu$W
$\delta\omega_1/\kappa_1$
$\Delta\omega/\gamma_2$
cascaded Kerr (odd in $\Delta\omega$)
thermal (even, always red)
measured total
antisymmetric part of the total
